DETAILED ACTION

Allowable Subject Matter

1. Claims 1 – 9 are allowed.

2. The following is an examiner's statement of reasons for allowance: Regarding independent claims 1, 2 and 8, a review of prior art failed to make obvious, disclose or fairly suggest a sample fabricating apparatus or method for forming a sample section by ion beam processing in which an angle formed between the optical axis of the ion beam emitted from the ion beam optical system and the sample surface is fixed or is larger than 0 degrees and smaller than 90 degrees and formation of the sample section is controlled in correspondence with a set-section depression angle or setting a depression angle of a section.

Claims 3-7 and 9 are allowed by virtue of their dependence upon claims 1 and 8 respectively.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patent 6,583,426 to Kawanami et al, U.S. Patent 6,417,512 to Suzuki and U.S. Patent 5,028,780 to Kaito et al. each describe an apparatus for forming a sample section by ion beam processing. There is an ion beam optical system, detector and specimen stage. However, each reference is silent with respect to formation of the sample section is controlled in correspondence with a set-section depression angle or setting a depression angle of a section.
